- Integrated Video Motion Detection
- Power over Ethernet or 12VDC
- Built-in Web Server, FTP Client, Email
- Connect to Alarm System for Triggering
- Compatible with Popular NVRs

Why Should I buy the NetCam SC?

The NetCam SC features all of the amazing features of the NetCam XL, but also includes:-

- Beyond High definition Resolution (Up to 5 Megapixel)
- Video Out - Perfect for surveillance monitoring
- POE Capable - Keep cable clutter to a minimum, power via ethernet cable.
- Optional Mechanical IR Filter - Use your NetCam SC Day and Night!

Unprecedented Video Quality

Unlike other IP camera companies, StarDot's history is deeply embedded in digital image processing. We didn't take a network device and simply throw in some imaging hardware. We packed fourteen years of digital image processing into our StarDot Imaging Engine™ processor and combined it with network hardware specifically designed for video transmission, The end result is that the clarity, color balance and low light performance of the NetCam SC video is light years ahead of the pack. But don't take our word for it, try one and see for yourself.
